

Evangel Hospital's Redevelopment Plan - Town Planning Board agreed to the Relaxation of Building Height Restriction

Evangel Hospital made the following announcement today (5 September 2023) regarding the Hospital's Redevelopment Plan:

With an aim to meet the ever-growing healthcare needs of Hong Kong, Evangel Hospital submitted to the Town Planning Board (TPB) an application for relaxing the building height restriction on the existing site for the purpose of its redevelopment plan. The application was deliberated on 28 July 2023 in the Meeting of the Metro Planning Committee under the TPB with the attendance of TPB members, Hospital representatives and consultants. Hospital representatives explained the importance of accepting the application to the re-development plan. If allowed, the Hospital would be able to provide more comprehensive medical services to the community while enhancing local visual amenity. The TPB Secretariat officially notified the Hospital on 11 August 2023 that the TPB agreed to the application of Evangel Hospital.

The Hospital will actively raise the necessary funds to implement the redevelopment plan. We believe that the redeveloped Hospital will enhance its services capacity to meet the increasing healthcare demands as well as to diversify the medical services for the benefits of the patients and community.
